

Cut security questionnaire review time from hours to minutes with AI Questionnaire Assistance

TAKE A TOUR

Boost productivity for internal review teams, and eliminate the back and forth for your customers.

A **SafeBase Trust Center** helps you avoid up to 98% of inbound security questionnaires. But, what about the residual questionnaires you receive?

Integrated into our Trust Center Platform, **AI Questionnaire Assistance** makes handling remaining security questionnaires quick, easy, and scalable with the perfect blend of automation and AI.

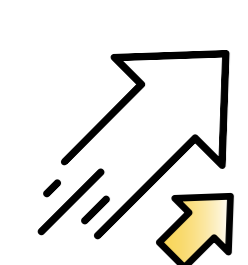

It isn't magic, but it'll feel like it.

80%
Time Saved

AI Questionnaire Assistance reduces time spent on questionnaires by 80% or more.

81%
Avg. Completion Rate

AI answers the majority of questionnaire questions — leaving a fraction of questions to manually address.

Save time and resources

AI Questionnaire Assistance taps into your existing Trust Center and Knowledge Base content, security artifacts, and external websites to expedite questionnaire response.

“Vendor security assessments were becoming a full time job for our team, so we tried AI Questionnaire Assistance. It has reduced assessment completion from 2-3 hours to 15-20 minutes. That's a significant reduction in workload.”

Questions

▼ 2

- 3.1 What is your Software Development Lifecycle (SDLC) policy?
- 3.2 Has your organization completed a CAIQ Lite questionnaire?
- 3.3 Do you have a data protection officer? If yes, please provide contact information.

SafeBase Google Chrome Extension

Search your Knowledge Base
Find answers from previous questionnaires

Search with AI
Use AI to find answers in your Trust Center

Create new questionnaire
We'll import all the questions into SafeBase

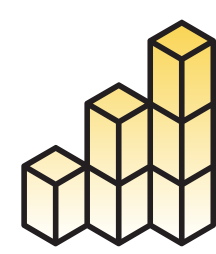

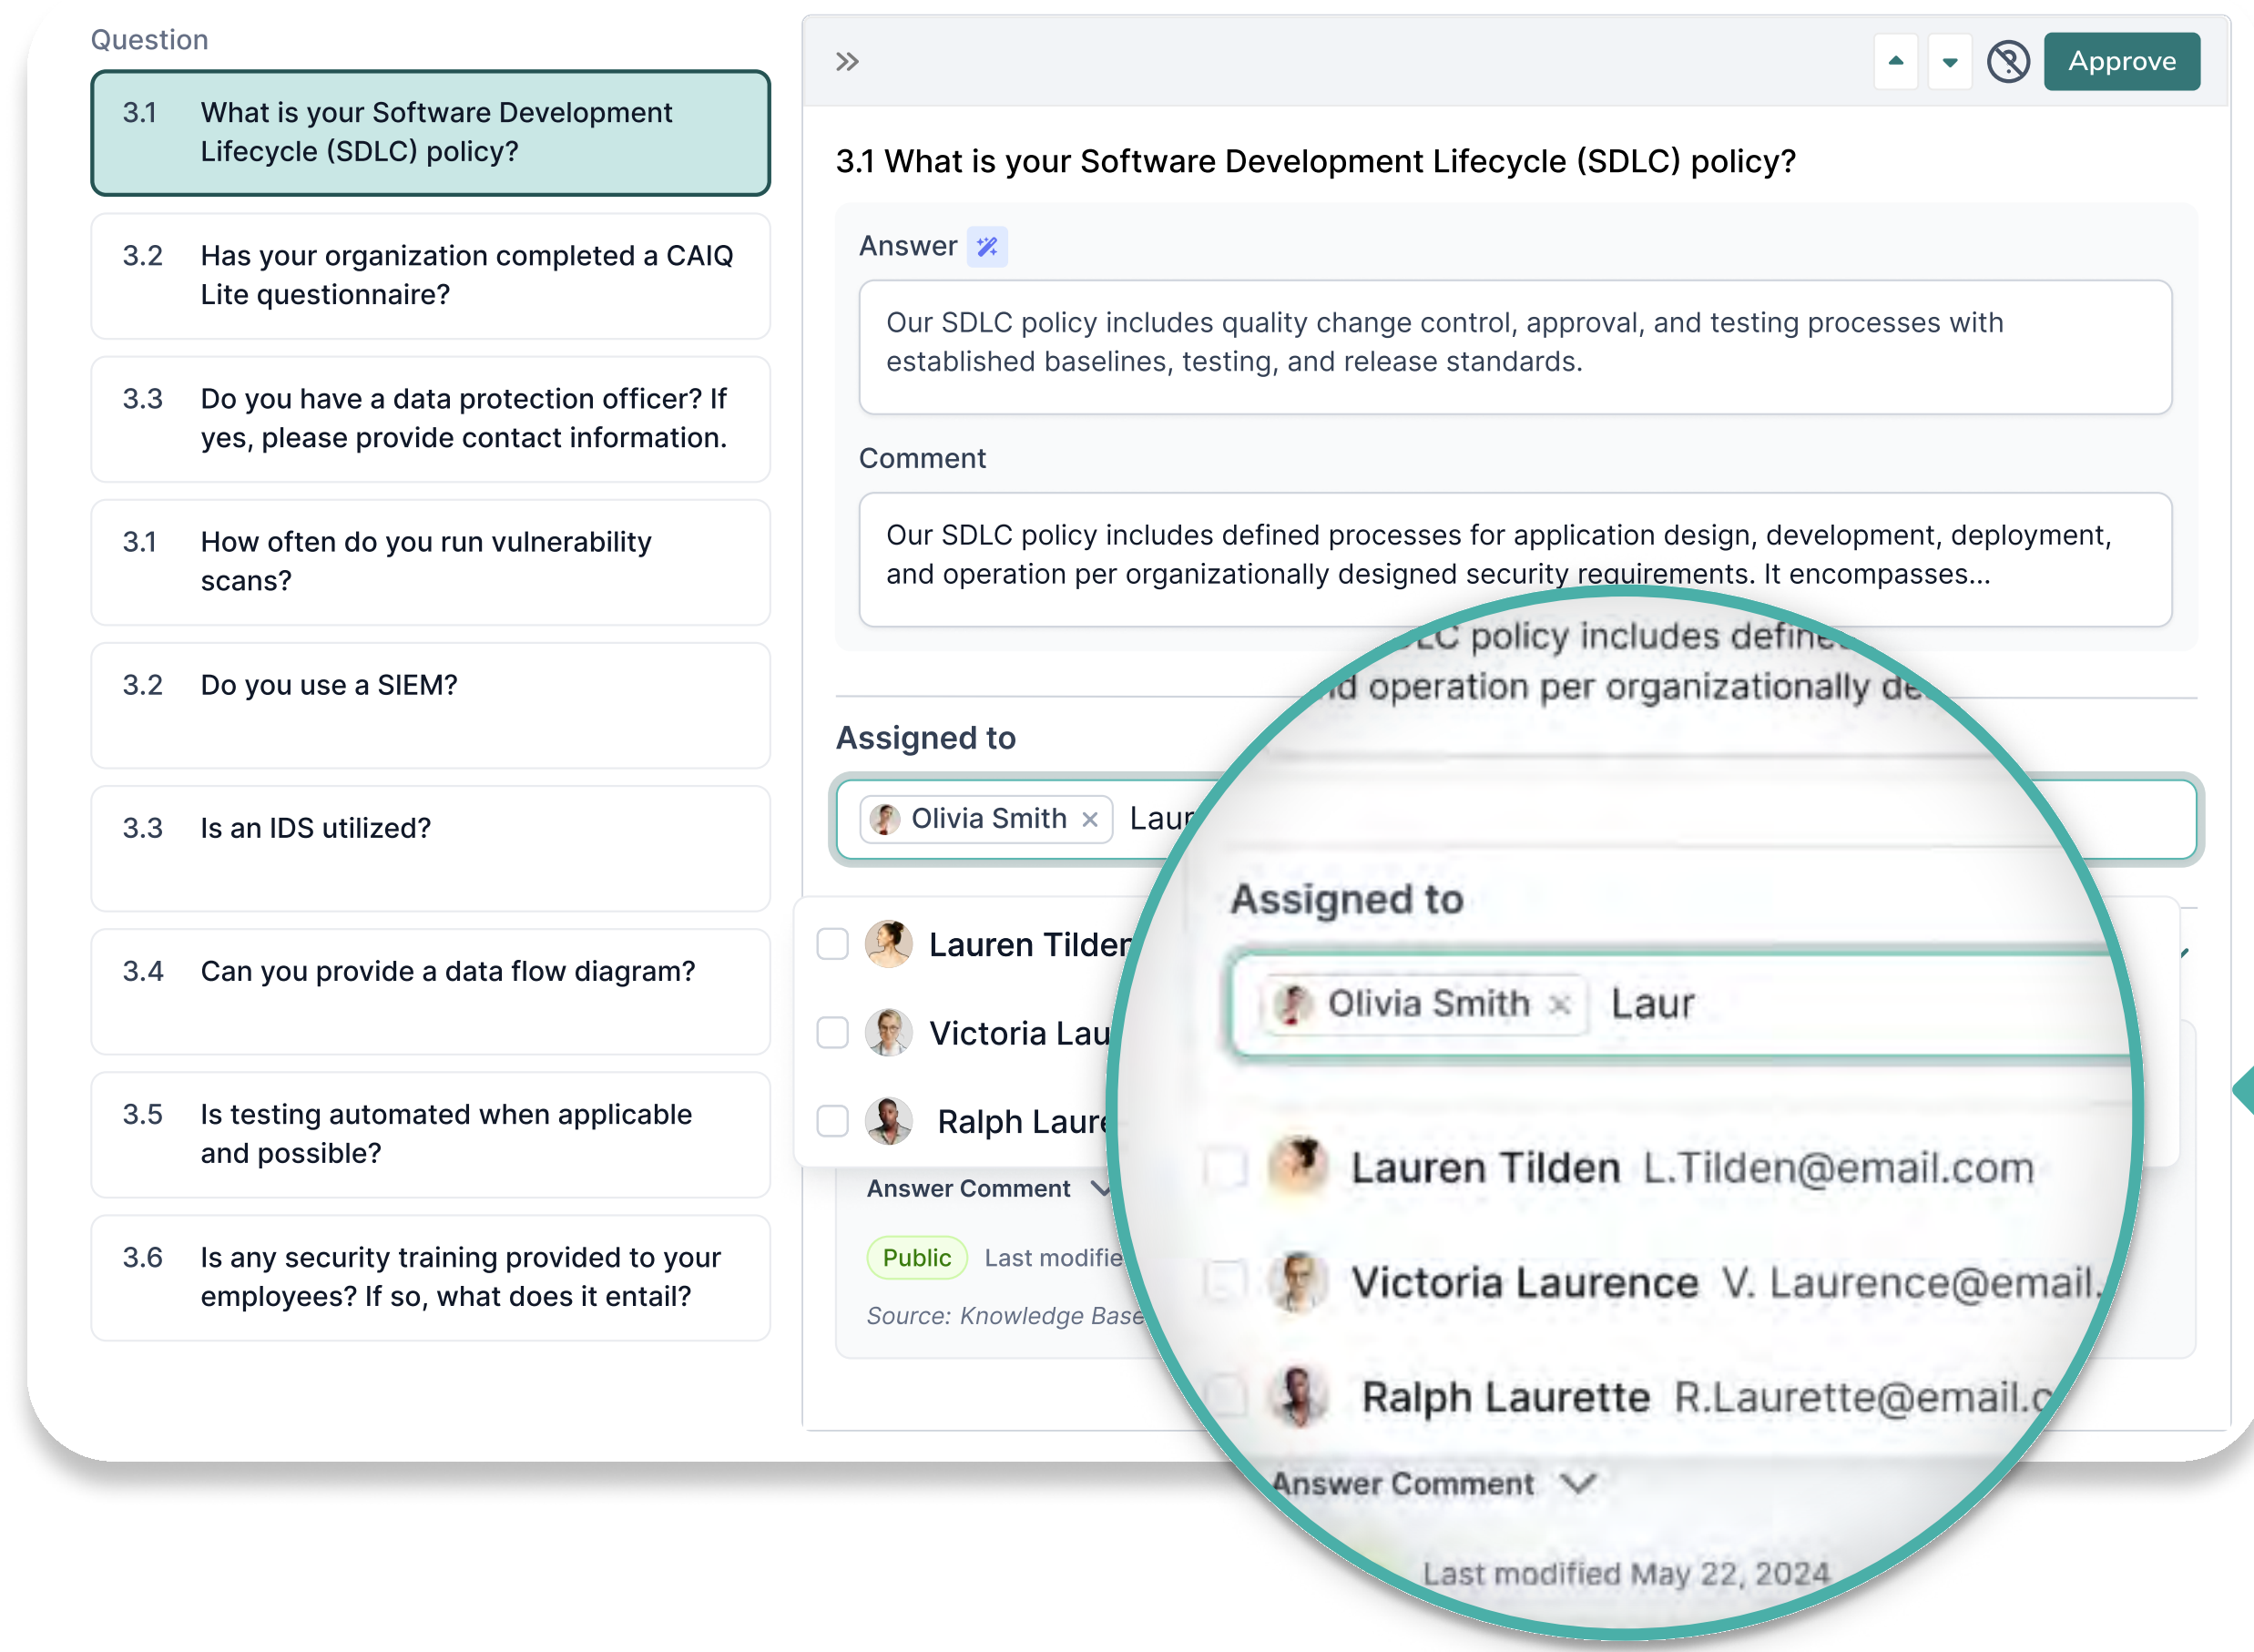

Fill answers
Bring answers into portal from a finished or ongoing questionnaire

A sampling of supported TPRMs and portals with **SafeBase Google Chrome Extension**.

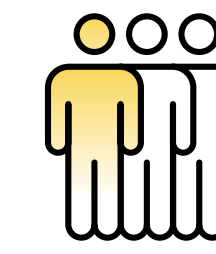

Respond to questionnaires at the source

The **SafeBase Chrome extension** supports several major TPRM portals and other common sources of questionnaires, like Google Forms and Google Sheets. Efficiently answer inbound questionnaires wherever you're working — upload via SafeBase or directly into a TPRM or portal, and in the format your buyer needs.

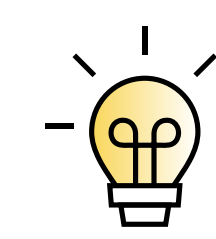

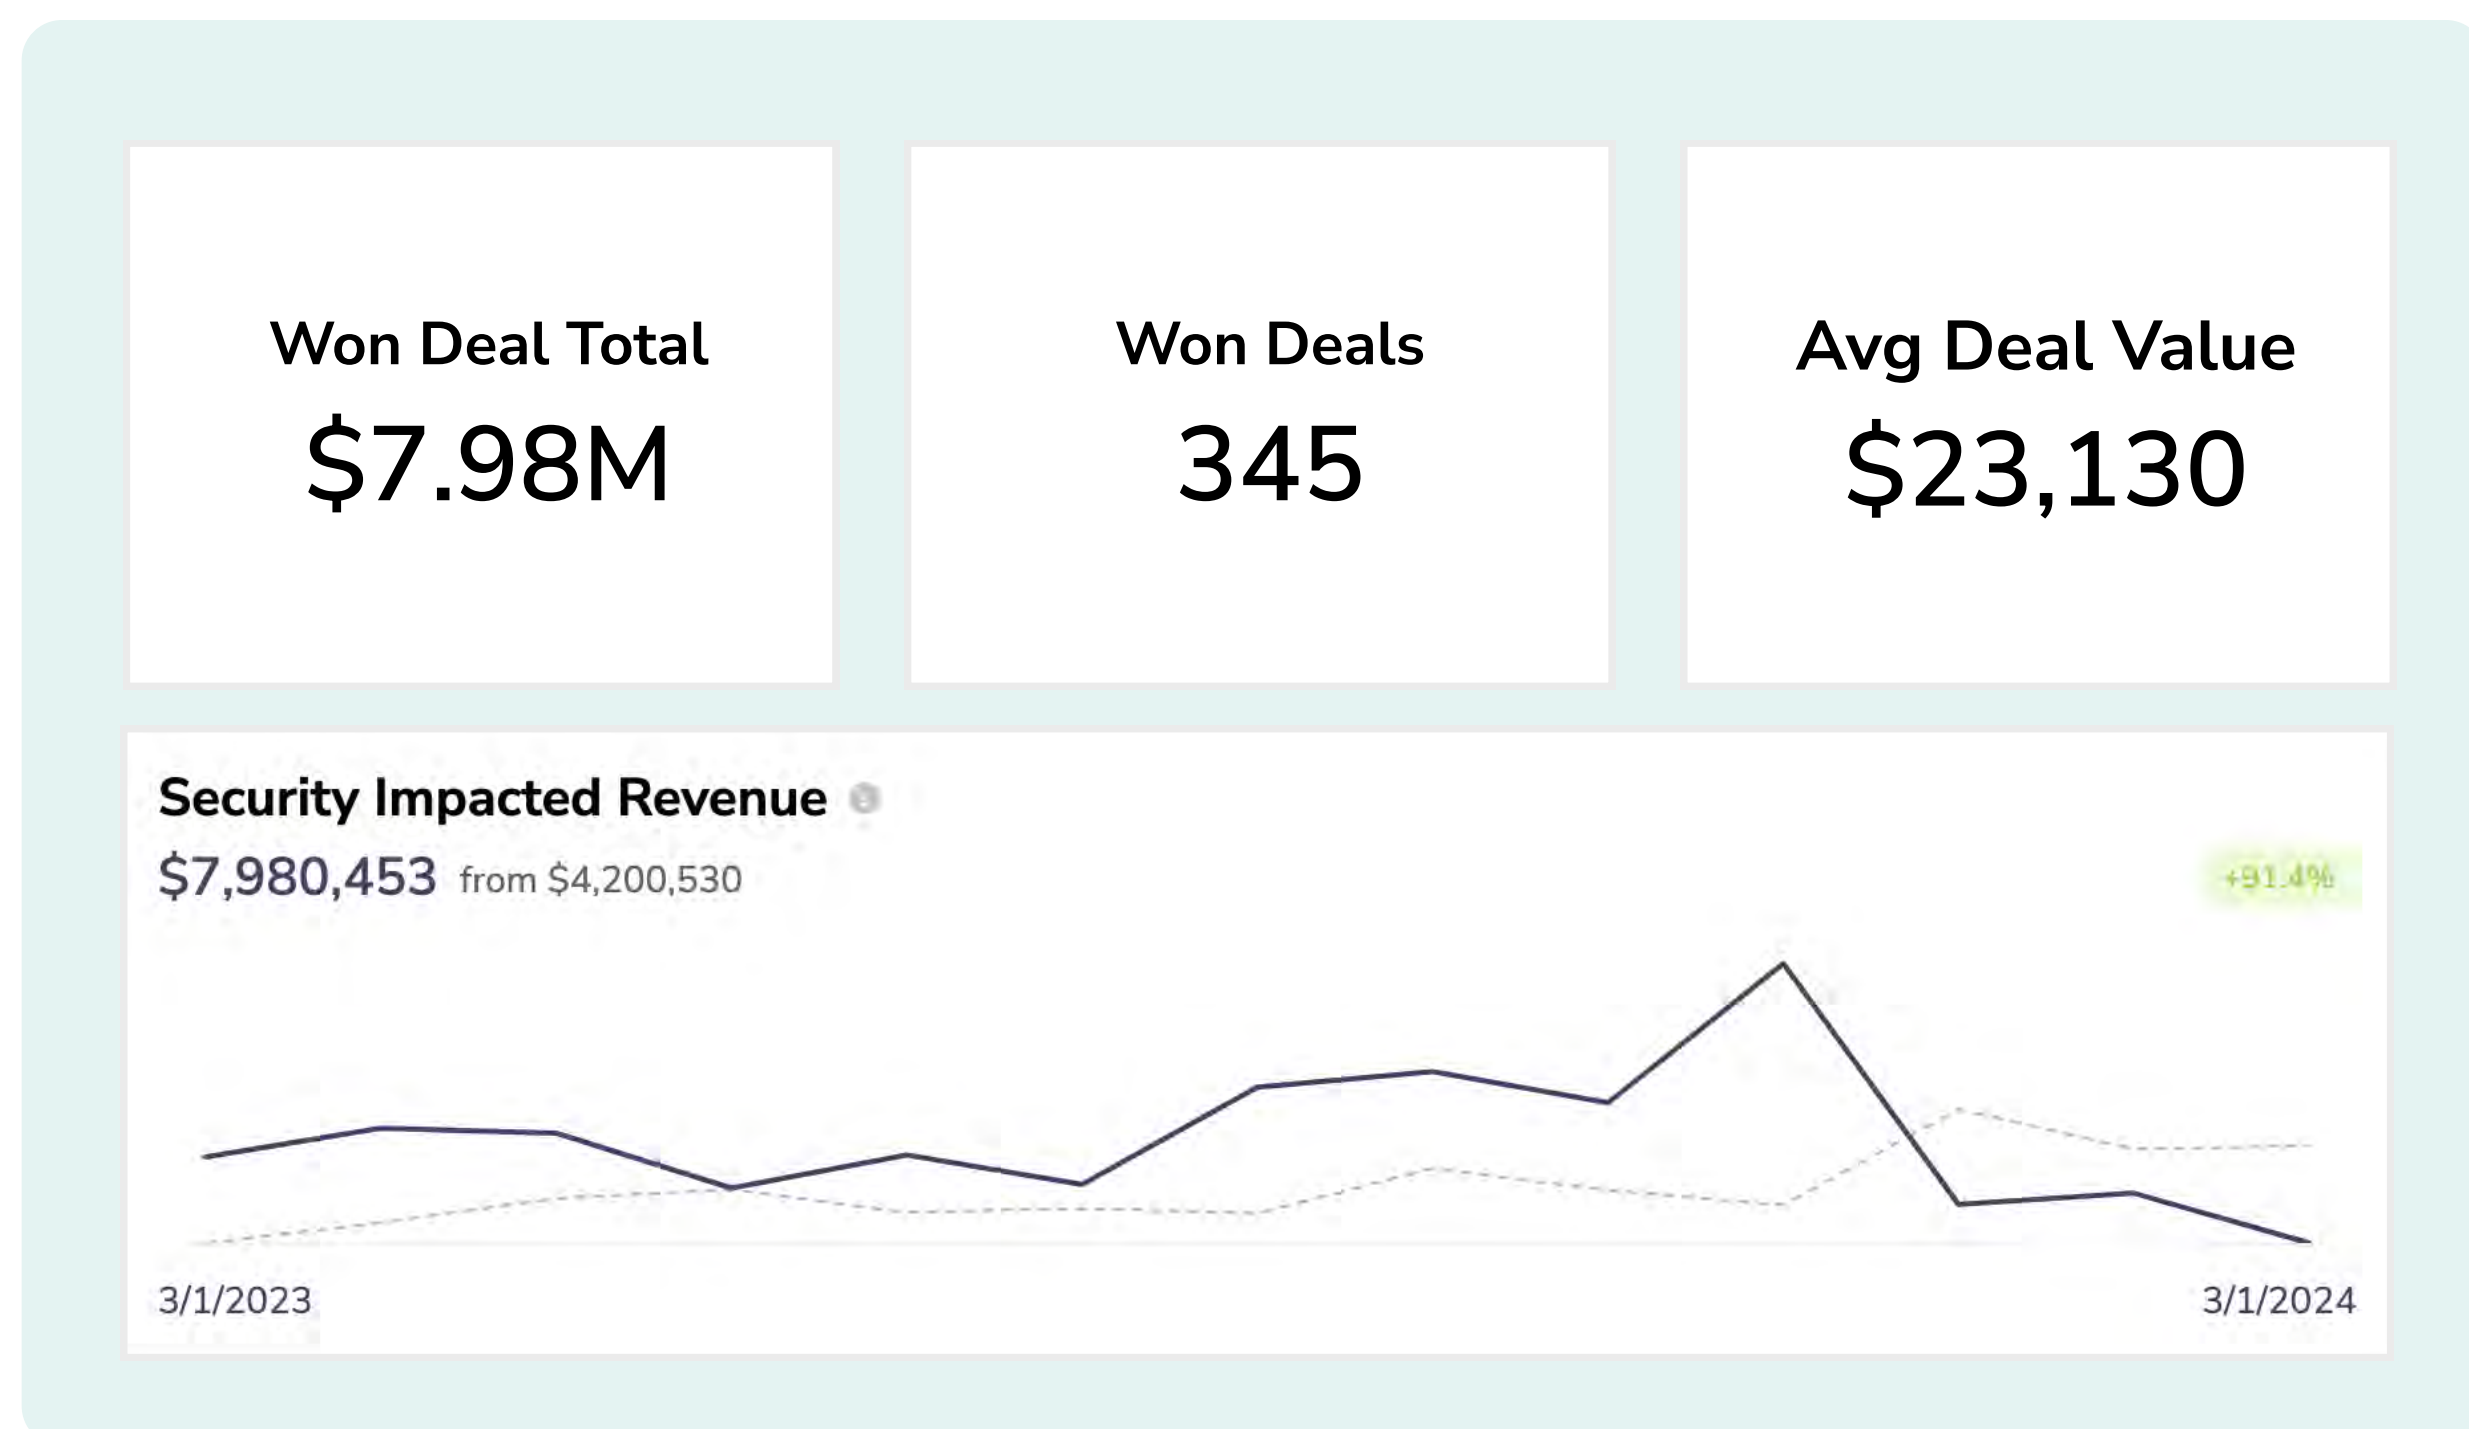

Scale questionnaire management

Centralized questionnaire management makes it easy to manage large volumes of questionnaires, no matter their complexity. Plus, simplify and scale cross-functional workflows with **Slack, Teams, Jira, and Salesforce integrations...and more.**

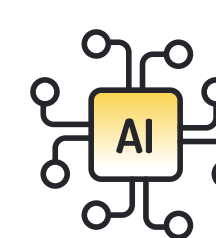

Collaborate on questionnaires

Enable easy knowledge sharing and eliminate time-consuming 'back and forth' between teams. With our collaboration features, you can **assign questions to subject matter experts**, specify answer due dates, and notify designated question owners.

Know where to spend your efforts

Pull revenue data into SafeBase to prioritize open security questionnaires based on current deal status and associated revenue, or better understand buyer trends based on questionnaire content with our Insights dashboards.

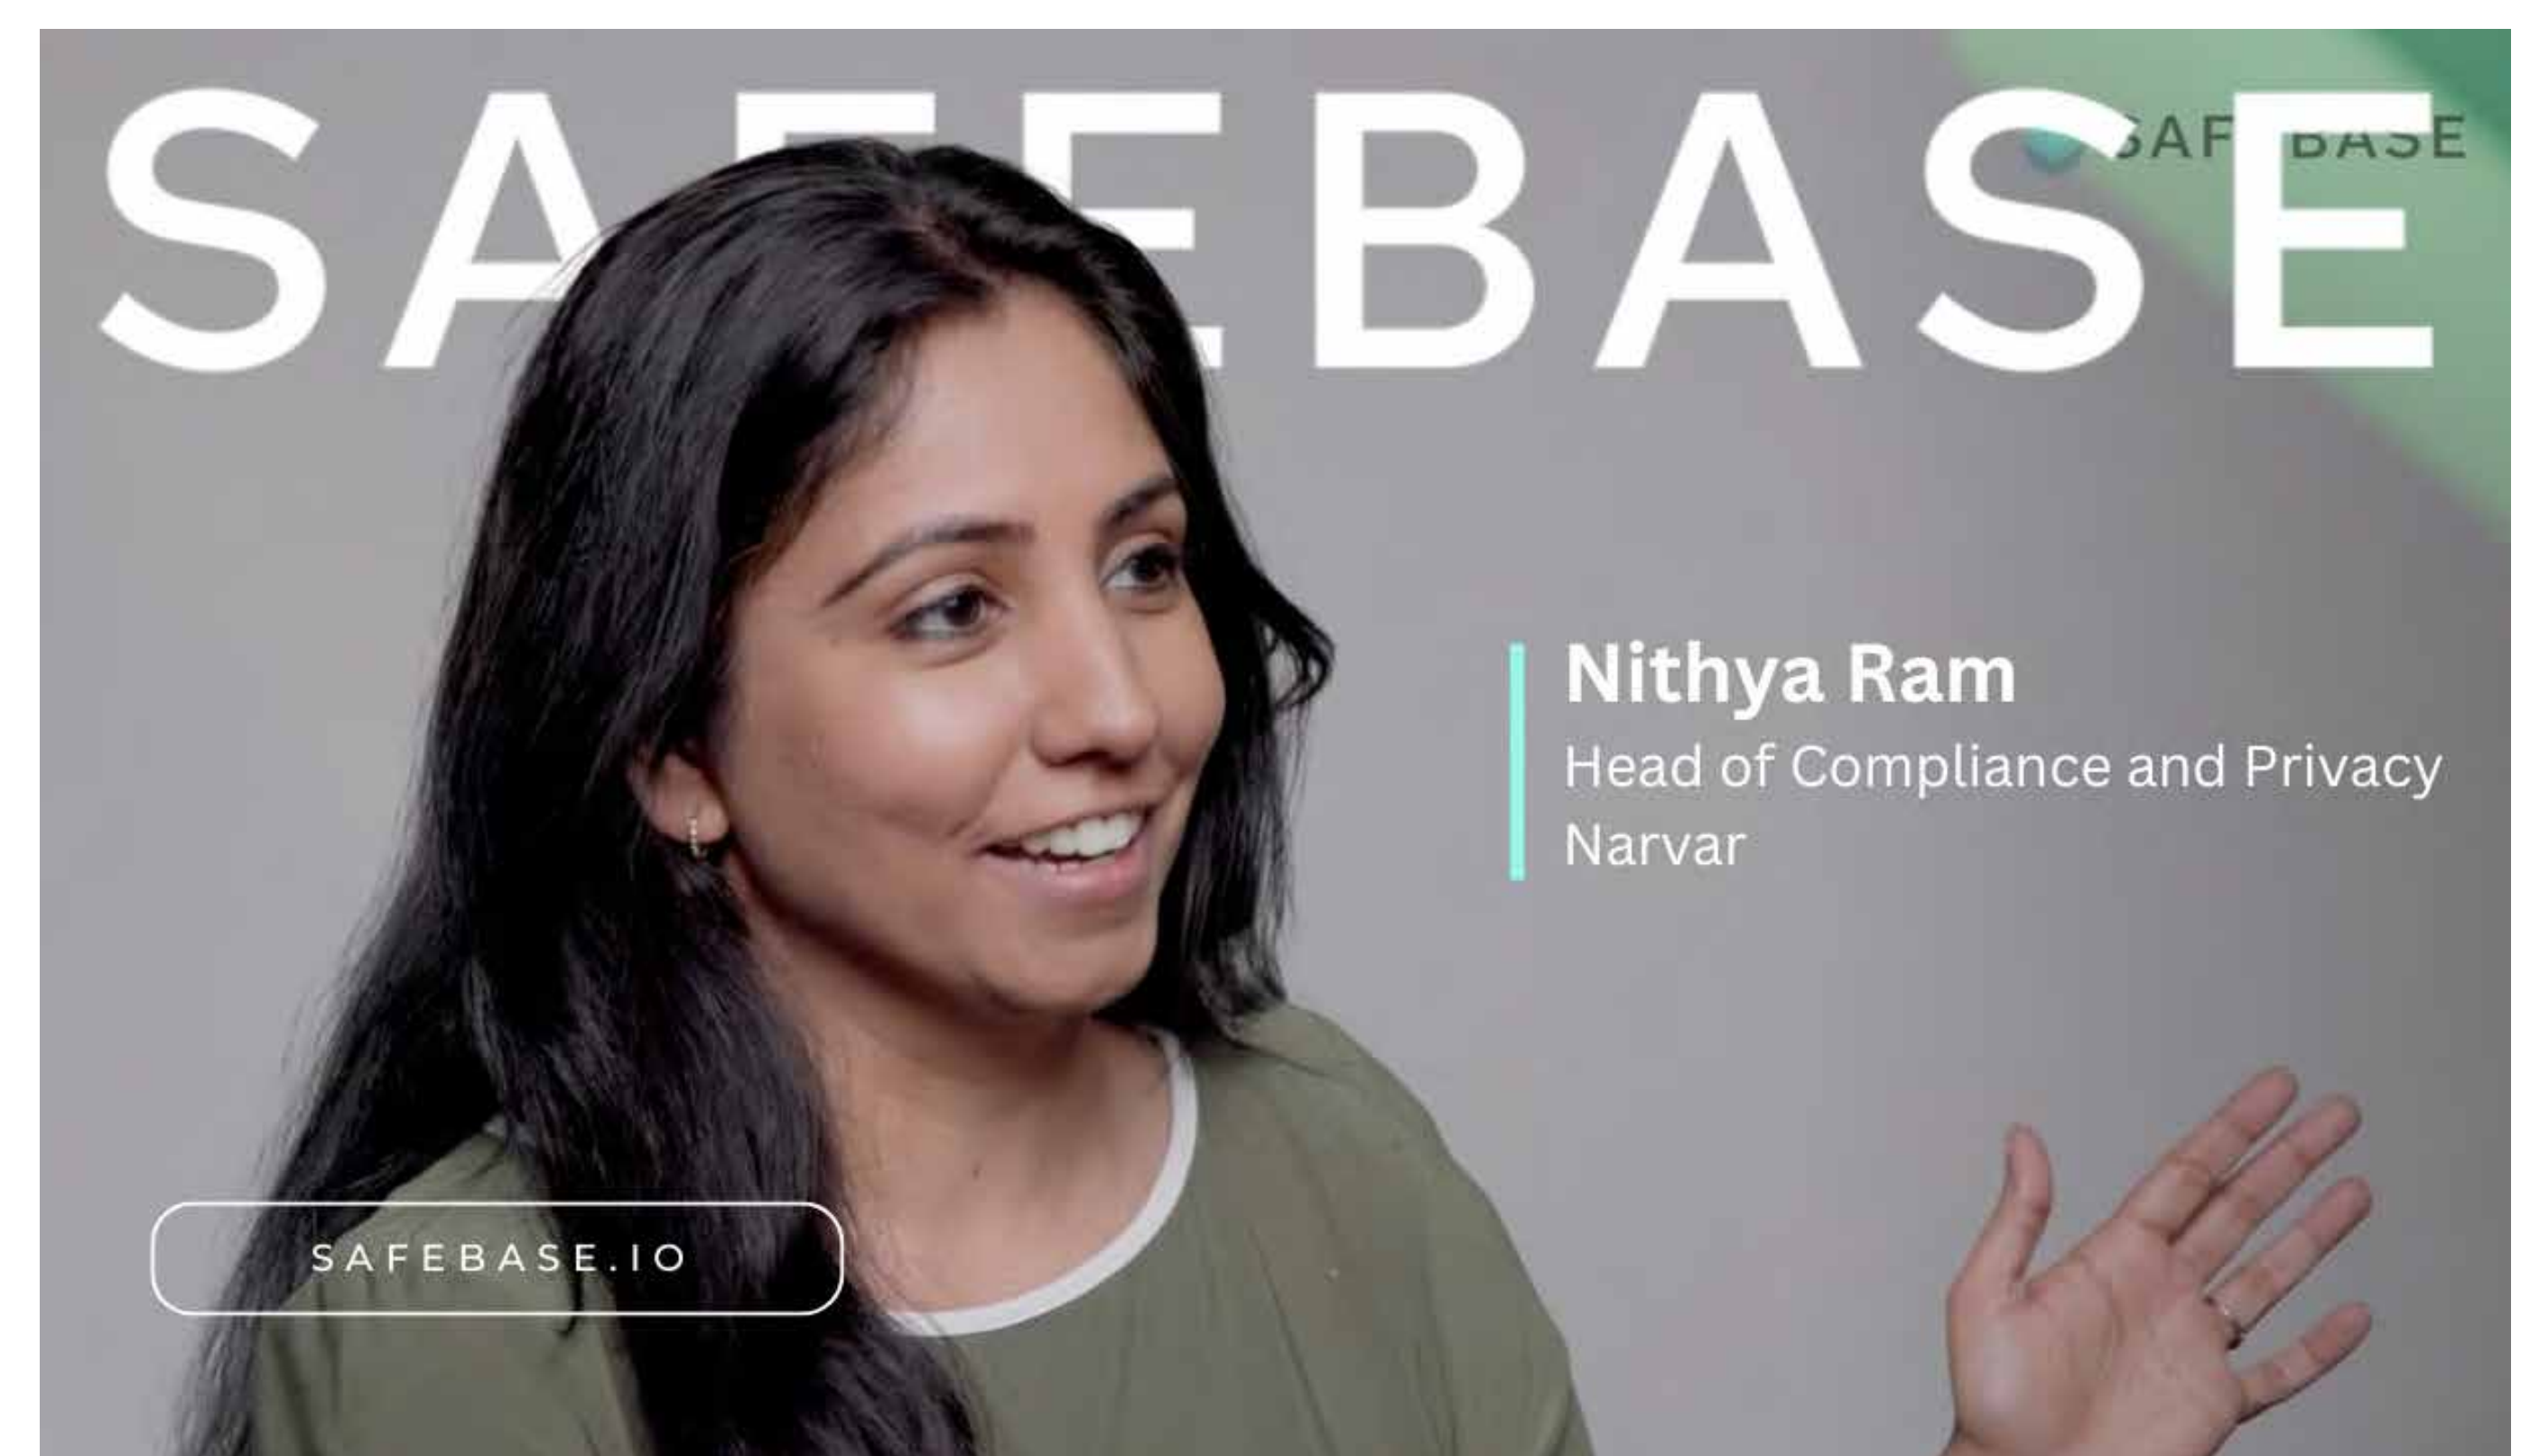

Keep your data secure

Your data never leaves your own private data store, we never use it to train the AI, and the AI only pulls information to answer questionnaires. Data is synced daily to ensure the most current information is used for responses.

“Click a button and watch it do it’s magic”

“It’s funny when they say ‘here’s a questionnaire, I know it’s going to take a week’ and then you churn it back in half a day...[they say] how did you do this?”

Nithya Ram
